Choose Your Cold Storage Solution...

Modular Cold Rooms

We supply and install modular coldrooms, in kit form, to create the cold room you need in the space available. Each cold room we install offers practical and professional solutions, with a broad range of sizes for both chiller and freezer applications, perfect for industries including hospitality, catering suppliers, restaurants, retail, dairy and pharmaceutical.

If your refrigeration space is limited, but a traditional refrigeration cabinet is no longer large enough or fit for purpose, then a modular cold room may be the answer for you.

Specification options:

Heights: Can range from 1800mm to 2400mm

Thickness: Can range from 75mm to 125mm (we can advise the correct option).

Sizes: From 1000mm to 4500mm

Panel types: Polyurethane (PU) and Polyisocyanurate (PIR).

Protection: Full vapour sealing as per specification.

Bespoke Built

Dragon Cold Rooms can build cold rooms with infinite flexibility, to custom specification, to fit the size space you have perfectly. Ideal for large industrial/commercial cold room specifications, our design experts will provide a fully project managed solution.

We supply and install a range of coldroom applications suitable to create a bespoke solution. Your dedicated Project Manager will work alongside your chosen refrigeration system provider to give complete project synergy.

Specification options:

Heights: Bespoke to project requirement

Thickness: Bespoke to project requirement.

Sizes: Bespoke to project requirement

Panel types: Polyurethane (PU), Polyisocyanurate (PIR) and Mineral Fibre.

Protection: Full vapour sealing and fire rating as per specification.

Flooring: Various options.

Ceiling Support: Panels suitable for ceiling suspension.

Colour: Various options.

Position: Indoor and outdoor options.
